

EU Type HDPE/NYLON/PU

FEATURES

- European Low Profile bucket for agricultural use.
- Ideal for handling grains, feeds, fertilizers, seeds, salt and chemicals, etc.

Usage Recommendations

- Minimum bucket spacing: bucket depth "C" + 5mm.
- For engineering purposes, we recommend using " $(Z-Y) + 5\%$ " for usable capacity.
- To be supplied with standard recessed holes.
- Venting holes are available in 5 patterns on request.

* Actual dimensions of the buckets will vary slightly depending on specified raw material. The dimensions shown above are for HDPE buckets. Size A, B and C for Nylon and Urethane buckets will be about dimensionally 2% larger than HDPE buckets.
