

Sieve Cleaners & Pan Cleaners

FEATURES

- Meets FDA requirements. Polyurethane material suitable for normal and wet environment.
- High bouncing, excellent abrasion resistance, good cleaning effect and longer working life.

Sieve Cleaners

Small Triangle (QA15-M)

Unique outline and heave in centre, which makes it easy to bounce on sieve.
Weight: 15g

Big Triangle (QA26-M)

Increased and thickened outline design which provide bigger potential energy and better cleaning effect.
Weight: 26g

Rivet Triangle (QD21-M)

Center rivet design let it contact with sieve pore to get better bounce as well as easier movement.
Weight: 21g

Brush Triangle (QM25-M)

The design not only provides bouncing on sieve, but also cleaning it at the same time. It greatly improves the final cleaning effect.
Weight: 25g

Cotton Canvas Pad (QB32)

The cotton design provides good protection to the sieve for getting long working life span.
Weight: 32g. Size: 75MM X 52MM X 9MM

Pan Cleaners

Crisscross Type (TS32-M)

Optimized outline and soft structure make it suitable for small spacing sieve.
Weight: 32g

Diamond Type (TL42-M)

Keeping original shape and flexibility even used for a long time. It's suitable for standard size sieve.
Weight: 43.5g

Quadrilateral Type (TF55-M)

It's suitable for standard size sieve and will reduce the damage to the frame.
Weight: 55g

Quincunx Type (TM68-M)

With bigger outline, it is suitable for bigger sieve.
Weight: 68g

Triangle Type (TJ81-M)

With increased thickness, it has good sieving effect and long working life.
Weight: 81g
